## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Tripp (6,516,337).

Regarding claim 1, Tripp discloses a directory (a central catalog) which has a first conduit between the directory and a first site; a second conduit between the directory and a second site (Column 5, lines 47 – 51); a receiver function (Column 5, lines 36 – 38) to accept: a first local catalog of directory information from the first site and a second local content catalog of directory information from the second site (Column 5, lines 38 – 45); and a global catalog of directory information that comprises the first local catalog and the second local catalog (Column 5, lines 36 – 38).

Regarding claim 2, Tripp discloses the idea that the first site and second site respectively reports the first local catalog and second local catalog to the receiver function according to a predetermined schedule (Column 6, lines 40 – 44).

Regarding claim 3, Tripp discloses that the first conduit and the second conduit each comprise the Internet (Column 5, lines 12 – 14).

Regarding claim 4, Tripp discloses the idea that the first and second local catalogs provide location information for a plurality of content objects (Column 5, lines 15 – 25).

Regarding claim 5, Tripp discloses the idea that the location information comprises at least a file name (Column 6, lines 13 – 14) and an address (Column 5, lines 14 – 15).

Regarding claim 6, Tripp discloses the idea of a first timer; and a second timer, wherein: the first local catalog is removed from the global catalog if the first site fails to respond before the first timer expires, and the second local catalog is removed from the global catalog if the second site fails to respond before the second timer expires (Column 10, lines 11 – 15).

Regarding claim 7, Tripp discloses a search web page and a directory web page that is coupled to the global catalog (Column 9, lines 57 – 60).

Regarding claim 8 and 15, see the rationale for the rejection to claim 1.

Regarding claim 9 and 16, see the rationale for the rejection to claim 2.

Regarding claim 10 and 17, see the rationale for the rejection to claim 3.

Regarding claim 12 and 18, see the rationale for the rejection to claim 4.

Regarding claim 13 and 19, see the rationale for the rejection to claim 5.

Regarding claim 14 and 20, see the rationale for the rejection to claim 6.

Regarding claim 15, see the rationale for the rejection to claim 7.
